EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Larry Liberchuk on August 13, 2007.

The application has been amended as follows:

The title was amended to better describe the invention and is changed to the following:

"A TASK MANAGEMENT SYSTEM FOR MANAGING A TASK SCHEDULED IN ADVANCE"

Claim 18 is amended to correct antecedent basis:

At claim 18, line 1, replace "method" with "system".

2. The following is an examiner's statement of reasons for allowance: The cited claims are allowable for at least the following reasons. The cited claims were rejected and presented to the Board of Appeals and Interferences wherein the examiner was

reversed because the cited prior art of record did not teach the claimed step of automatically removing the reminder message upon receiving the second signal from the first sensor indicating completion of the scheduled task. Claim 11 has a similar limitation without the indication of completion of the scheduled task. Newly cited reference Jeyachandran (U.S. Patent 6,834,387) substantially teaches the limitations of the claims also with the added feature of a suspension instruction that can suspend tasks that are processing and rescheduling them to be performed in the future. Jeyachandran also teaches scheduling the execution of tasks, i.e. notification or reminder tasks regarding a user's calendar, based upon a user's presence, e.g. its location to the scheduled event. If the presence of the user is near the location of a meeting, the notification is adjusted. However, the claims still read over Jeyachandran because there is no express teaching of "automatically removing the reminder message upon receiving the second signal from the sensor." At best, the teachings of Jeyachandran either allows a user to manually stop a notification, or attempts another notification based on the proximity of the user to the scheduled event. There is no express teaching of an automatic suppression of the reminder message and therefore the claims are allowable over the art of record.

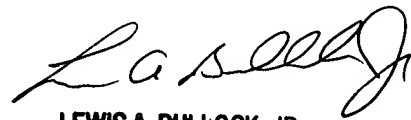

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
